Massachusetts Nurserymen's Association New England Nurserymen's Association American Association of Nurserymen and Boston Market Gardeners' Association

We are closed to business on the Fourth of July, Labor Day and all Sundays

POR twenty-five years we at Weston have been growing and supplying superior nursery material to the discriminating residents of suburban Boston.

Our fields are stocked with the finest selection of hardy plants and perennials to insure immediate effects for your landscape picture.

Some plants listed are not plentiful in all sizes, although we anticipate the greatest demand in our history. Accordingly, we cannot be held responsible for the delivery of any plant, if it is sold out when your order is shipped.

We invite you to use our Landscape Department. Through its representatives, who are qualified in the art of planning and planting, you are not only able to achieve your objectives with greater ease, but you are assured proper soil conditions to insure successful growth. The landscape salesmen know best what types of trees and shrubs will easily move and adjust themselves to your soil conditions. The planting crews, under their supervision, complete the physical operation in short order, and the responsibility of maintenance is explained in such a way that you can readily provide adequate after-care.

Few plantings flourish without attention. Shrubbery should be pruned after flowering; dead and diseased wood should be removed from shade trees, and fertilizer and manure added to enrich the leached-out soil.

We are equipped to meet every requirement of your garden from season to season. Our Landscape Department is your garden insurance, paying yearly dividends in beauty and charm!

# **Evergreens**

Evergreens have long played a part in shaping lives and habits of peoples of the world. Since the beginning of time they have been grown for medicinal purposes and food value and were frequently regarded with reverence or as a symbol attending many customs. It is no wonder that the Pilgrim Fathers gave thanks for the green forests of New England and in gratitude for the fuel and comfort received there chose the Pine Tree to adorn their first coins—the Pine Tree Shillings. Our nursery, with acres of vigorous, hardy evergreens, can supply and meet your most exacting landscape requirements.

WE ARE fortunate to have at our disposal broad-leaved evergreen plants that seem happiest when growing in fairly adverse conditions. This group consists of varying forms of Rhododendron and Holly, as well as the graceful Leucothoe and ever-popular Mountain Laurel. Their tolerance of shade insures them a warm welcome in corners of the landscape where other shrubs fail to survive.

In nature we find many of these evergreen shrubs thriving in the undisturbed woodlands along the eastern seaboard and westward through the hilly sections of the Appalachian range.

When planted beneath trees or on the north side of buildings, they will continue to give brilliant color to an otherwise drab land-scape. However, for maximum flower array, full sunlight is desirable and necessary.

Perhaps their greatest asset is a low and compact growth, which, when lightly trimmed, insures greater vigor and in maturity prevents a rank and straggly appearance.

Since climatic conditions in New England are ideal for plants in this group, we highly recommend them for all conditions where shade predominates as well as in full sunlight. Profusion of flower color may be realized from early spring until late June by combining Rhododendron varieties with Japanese Andromeda, Mountain Andromeda, Drooping Leucothoe and Mountain Laurel. And for foliage contrast and along foundation walls where building lines are ugly, interplant with spreading Yews and Junipers. Our selection of broad-leaved evergreens represents a large percentage of the Hopkinton nursery and it is our belief that these plants are the finest to be had.

## Deciduous Shade and Ornamental Trees

We grow a large number of shade and ornamental trees, as indicated by the following pages.

Good root systems and healthy well-pruned tops combine to make our trees desirable for ease in transplanting and after care.

Of particular interest to the small home-owner should be the flowering trees that require little care, and offer flowers, fruit, beautiful foliage and shade. We recommend Dogwoods, Magnolias, Flowering Crabs and Cherries as being particularly useful and ornamental on the small home grounds.

## Flowering Crabapples

Enthusiasm is difficult to restrain when Crabapples are in bloom. The dainty pastel shading of the airy flowers, the brilliant coloring of the fruits, the intricate cross-branching habits, all serve to set them apart as worthy of a place in almost every planting. Many make fine jellies, and many provide food for the birds.

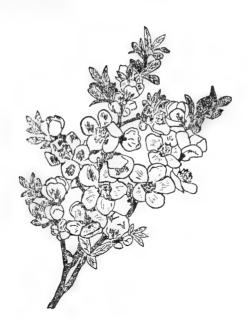

We grow our Crabapples both for specimen plants and for screening purposes, the latter being low-branched and in shrub form.

# Hardy Ornamental Shrubs

It is interesting to note that many of the common shrubs in our everyday landscape are available to us because of the exacting efforts of early plant-hunting expeditions to distant corners of the world.

The growth of horticultural interest in America has necessitated broader cultivation of plant varieties and the development of new forms. The following listed plants are representative of the entire ornamental shrub group and individually have their place as specimens or as a part of the flowering shrub border. You will find them hardy and readily adjustable to your garden or home landscape and a never-ending source of pleasure in flower color and ornamental fruits.

# Vines and Climbing Plants

The average garden is seldom complete if it lacks the finishing touch of a vine to soften an unsightly arborway or fence corner. Nothing in the plant realm provides a more rapid cover for harsh stone or brick walls, and the combination of flower, fruit and ornamental fall foliage compels their use somewhere in the landscape theme.

## Perennials and Rock Garden Plants

During the past twenty-five years we have given particular attention to the growing of hardy perennials, and during these years we have tried and tested hundreds of varieties, both old and new. We have found that the plants in the following list are best suited for our New England gardens.

Our perennial gardens are adjacent to the office and parking area, and our customers take great delight in periodic visits to the nursery throughout the growing season to view the succession of blooms. A large number, in this way, discover their preferences and personally select their plants.

Our plants are field-grown, and consequently have vigorous root systems, which assure successful transplanting.

The plants are 50c. each, 3 of one variety \$1.35, 10 of one variety \$3.50, unless otherwise marked. 5 or more of one variety may be purchased at the 10 rate.

The asterisk (\*) indicates varieties particularly well adapted for the Rock Garden

The ultimate height of the plant is given in feet and inches.

The approximate time of flowering is given in months.

### Hardy Chrysanthemums

We believe the chrysanthemum offers to home gardens more real flower value than any other plant.

We recommend planting chrysanthemums during the early part of the summer, rather than waiting until they are in bloom. The plants develop and flower better if they are planted before the flower buds develop, and they become better established to survive the winter. (However, chrysanthemums may be planted successfully even when in full bloom.) Once in the garden proper they can be pinched back, staked, fertilized and watered, to suit the garden in which they will display their beauty during the long autumn season.

# Conditions of Sale

IT is to our own interest to see that only good and correctly labeled plants leave the Nursery, but we give no guaranty, express or implied, as to description, growth and success of any stock we sell, for it depends on correct planting, proper soil, weather conditions, and the general care of the plants.

We accept all orders upon the condition that they shall be void should injury befall the stock from frost, fire, hailstorm, or other causes over which we have no control.

Any errors made by us will be gladly rectified if notice is given within ten days after receiving the stock. If any plants are found to be misnamed, we will replace them the next planting season.

We sell five plants of the same variety at the rate of ten.

All parcel post, express or freight charges are paid by the purchaser. On orders packed for shipment there is a small additional charge for packing, at cost. (See order blank—page 69.)

Prices are subject to change without notice.

We reserve the right to make an additional charge for specimen plants selected in the field.

A certificate of State and Federal inspection for freedom from injurious insects (gypsy moths, Japanese beetles, etc.) or disease on our plants is available with every order.
